April 15, 2020

To whom it may concern,

Hereby I confirm that Talantbek Akmatov worked for TomTom as a regional specialist in spatial data analysis with the responsibility zone of the Republic of Kyrgyzstan from April 2019 till April 2020. Talantbek Akmatov was responsible for updating digital maps for car navigation, collecting information about road infrastructure (e.g. points of interest), changes in the road network. He used various software tools and technologies, worked with vector data and satellite images, performed different kind of analysis and data handling.

Talantbek Akmatov proved himself as a competent and qualified specialist who independently and successfully solved the tasks assigned to him. He made a significant contribution to the maintenance of the road network of Kyrgyzstan and other Central Asian countries, also performed work on the territory of the Russian Federation and Turkey.

Thanks to the knowledge acquired in the company and the successful mastery of corporate software tools, Talantbek successfully completed all the trainings assigned to him, and thanks to his efficiency and accuracy, he carried out all the tasks assigned to him.

Talantbek has the ability to quickly master new information (also in English), easily communicates with colleagues, is sociable, friendly and extroverted.

Overall, I can characterize Talantbek Akmatov as a diligent employee and a promising employee capable of successfully coping with the tasks assigned to him.

The reason for his departure was a structural reorganization which unfortunately forced us to close the direction in which he worked.

Sincerely,

Mikhail Konoplev
